

Characteristics

The direct operated valves series D3W with inductive position control are typically used in safety relevant applications. The start or the end position can be monitored.

The fail-safe position of the directional valve during power failure is the spring offset position.

Please find detailed information on the machine directive in the position paper in chapter 1.

2

Attention:

The adjustment of the position control is factory set and sealed. Replacement and repairs can only be undertaken by the manufacturer.

| General | | | | | |
|--|---|--------|--------|--------|---------|
| Design | Directional spool valve | | | | |
| Actuation | Solenoid | | | | |
| Size | DIN NG10 / CETOP 05 / NFPA D05 | | | | |
| Mounting interface | DIN 24340 A10 / ISO 4401 / CETOP RP 121-H / NFPA D05 | | | | |
| Mounting position | unrestricted, preferably horizontal | | | | |
| Ambient temperature [°C] | -20...+60 | | | | |
| MTTF _D value [years] | 150 | | | | |
| Weight [kg] | 5.2 | | | | |
| Hydraulic | | | | | |
| Max. operating pressure [bar] | P, A, B: 350; T: 210 | | | | |
| Fluid | Hydraulic oil according to DIN 51524 | | | | |
| Fluid temperature [°C] | -20 ... +70 | | | | |
| Viscosity permitted [cSt] / [mm ² /s] | 2.8...400 | | | | |
| Viscosity recommended [cSt] / [mm ² /s] | 30...80 | | | | |
| Filtration | ISO 4406 (1999); 18/16/13 | | | | |
| Flow max. [l/min] | 150 (see shift limits) | | | | |
| Leakage at 50 bar [ml/min] | Up to 20 per flow path, depending on spool | | | | |
| Static / Dynamic | | | | | |
| Step response at 95 % | Energized: 105; de-energized: 85 | | | | |
| Electrical characteristics | | | | | |
| Duty ratio | 100 % ED; CAUTION: coil temperature up to 150 °C possible | | | | |
| Max. switching frequency [1/h] | 10000 | | | | |
| Protection class | IP65 in accordance with EN 60529 (with correctly mounted plug-in connector) | | | | |
| | Code | K | J | U | G |
| Supply voltage / ripple [V] | | 12 V = | 24 V = | 98 V = | 205 V = |
| Tolerance supply voltage [%] | | ±10 | ±10 | ±10 | ±10 |
| Current consumption hold [A] | | 3 | 1.5 | 0.35 | 0.18 |
| Power consumption hold [W] | | 36 | 36 | 34 | 36 |
| Solenoid connection | Connector as per EN 175301-803, solenoid identification as per ISO 9461. | | | | |
| Wiring min. [mm ²] | 3 x 1.5 recommended | | | | |
| Wiring length max. [m] | 50 recommended | | | | |

With electrical connections the protective conductor (PE \downarrow) must be connected according to the relevant regulations.

¹⁾ Only guaranteed with screened cable and female connector

M12 pin assignment

- 1 + U_s 19.2...28.8 V
- 2 Out B: normally open
- 3 0V
- 4 Out A: normally closed

Outputs: Open collector

Definitions

Start position monitored:

The valve is de-energized. The inductive switch gives a signal at the moment when the spool leaves the spring offset position (below 15 % spool stroke).

At the switching point the spool is located within the closed position. It is secured that only the flow paths of the offset position are granted.

End position monitored:

The inductive switch gives a signal before the end position is reached (above 85 % spool stroke).

The switch can only be located on the opposite side of the solenoid for direct operated valves. Please order plug M12x1 separately (see accessories, plug M12x1; order no.: 5004109).

Position Control

M12 pin assignment

- 1 U_s 10...30 V
- 2 not connected
- 3 0 V
- 4 Out A: normally open

Definitions

Start position monitored:

The valve is de-energized. The inductive switch gives a signal at the moment when the spool leaves the center position (below 15 % spool stroke).

At the switching point the spool is located within the closed position. It is secured that only the flow paths of the offset position are granted.

End position monitored:

The inductive switch gives a signal before the end position is reached (above 85 % spool stroke).

Please order plug M12 x 1 separately. Straight plug recommended – no defined position possible for angled plug.

The flow curve diagram shows the flow versus pressure drop curves for all spool types. The relevant curve

number for each spool type, operating position and flow direction is given in the table below.

| Spool | Position b | | Position a | | Position 0 | | | | | | |

Flow curve diagram

All characteristic curves measured with HLP46 at 50 °C.

Shift limit diagram

The diagram below specifies the shift limits. Valves with spool position “F” or “M” can only be operated up to 70 % of the limits. The specifications apply to a viscosity of 40 mm²/s and balanced flow conditions. The shift limits can

be considerably lower at unbalanced flow conditions. To avoid flow rates beyond the shift limits, a plug-in orifice can be inserted in the P-port.

Measured with HLP46 at 50 °C, 90 % U_{nom} and warm solenoids.

| Surface finish | Kit | Kit | Kit | Kit |
|---|-------|---------------------------|------------------|---|
| $\sqrt{R_{max} 6.3}$ $\square 0.01/100$ | BK385 | 4x M6x40 ISO 4762-12.9 | 13.2 Nm ±15 % | NBR: SK-D3W-30 FPM: SK-D3W-V-30 |

The space necessary to remove the plug per EN 175301-803, design type AF is at least 15 mm.

The torque for the screw M3 of the plug has to be 0.5 to 0.6 Nm.

The space necessary to remove the M12x1 female connector is at least 22 mm.

Attention:

The adjustment of the position control is factory set and sealed. Replacement and repairs can only be undertaken by the manufacturer.

¹⁾ Please order plug M12x1 separately (see accessories, plug M12x1; order no.: 5004109).

²⁾ Please order plug M12x1 separately. Straight plug recommended - no defined position possible for angled plug.
